## **Project Title: Mirrorless Camera**

**1.3D Model**

**2.Isometric View**

**3.Orthographic projections.**

**Object Description:** This project represents a 3D mechanical model of a camera body, created using basic geometric shapes such as cylinders, cubes, and rectangular blocks. The model includes a main body, lens, shutter button, and a viewfinder block all dimensioned accurately with measurements like 100 mm width, 50 mm height, and a 50 mm lens diameter.
